

GBGI Heavy Duty Cast Opener Assemblies

Field Tested, Proven Tough

Made in the USA

Tired of replacing off-shore made opener assemblies season after season? Put your seed in the soil with a heavy duty, American made cast opener assembly that will outlast the equipment you plant with!

Introducing Enviro-Max XP™

GBGI's new and improved ductile iron bearing housing is proudly cast and machined in the USA.

Assembly includes a tough boron steel blade made in the USA, and a premium PEER double row sealed ball bearing.

Unparalleled Quality

Eliminate costly downtime and get your seed in the field when it counts with Enviro-Max XP™. The American made opener minimizes runout and failure while maximizing your yield. Available today at your local dealer.

- **Large rivets** prevent shearing under increased load and speed of today's machines
- **Precision machining** helps minimize runout
- **Solid steel press fit dust cap** keeps bearings protected from dirt and debris in harsh environments
