

INTENSE TILLING TOUGH

IDA-X™

Independent Disc Assembly for Tillage Equipment

The IDA-X™ hub assembly has a robust design and ductile iron construction that substantially increases the load capacity and impact resistance compared to conventional fabricated welded assemblies.

Tested in the most demanding conditions, IDA-X™ keeps rolling where others fail. Reducing warranty costs and downtime.

Off the shelf, bolt on ready, eliminates fabricating labor and costly inventory

Ductile iron hub and mount provide strength, wear resistance and dependability

GBGI's unique 3-piece seal protects against premature bearing failure

Designed, engineered, manufactured and assembled in-house for quality control
